EDUCATION

2018 - 2022

APJ ABDUL KALAM

TECHNOLOGICAL UNIVERSITY,
INDIA

- Bachelor of Technology (B.Tech)
Computer Science & Engineering

TECH STACK

- Frontend:** React.js, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/SASS, Bootstrap
- Backend:** Node.js, Nest.js, Express.js, Python
- Databases:** PostgreSQL, MongoDB
- AI Tools:** Claude Code, Cursor AI, ChatGPT
- Tools:** Git, GitHub, Postman, Jira, Asana, Kanban Boards, Figma, VS Code

PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience designing, developing, and maintaining scalable web applications using **React.js, Node.js, JavaScript, TypeScript, Nest.js, Express.js, PostgreSQL, and MongoDB**. Experienced in end-to-end product development, REST API integration, database design, production support, and performance optimization. Proficient in Agile development, collaborating with cross-functional teams, and delivering high-quality software solutions. Skilled in leveraging modern AI tools, including **Claude Code, Cursor AI, and ChatGPT**, to accelerate development, improve code quality, and enhance productivity.

WORK EXPERIENCE

- Full-Stack Developer** NOV 2025 - PRESENT
Infobahn Consultancy-Dubai,UAE
 - Developing and maintaining enterprise web applications using **React.js, Node.js, TypeScript, JavaScript, and Nest.js**.
 - Contributing to **Sedres**, a large-scale maritime and port operations management platform for managing vessel movements, operational tasks, and logistics workflows.
 - Participating in **client meetings** to gather requirements, discuss solutions, provide technical updates, and deliver product demonstrations.
 - Independently developed and successfully **deployed SGIVS (Smart Government Integrated Visa Services)**, delivering end-to-end frontend and backend modules.
 - Building complex **data-driven user interfaces** including dashboards, Kanban boards, admin panels, and role-based operational screens.
 - Designing reusable UI components, implementing scalable architecture, and managing application state for maintainable enterprise applications.
 - Integrating **RESTful APIs** and implementing secure authentication, dynamic workflows, and real-time data handling.
 - Optimizing frontend performance through efficient API handling, lazy loading, code splitting, and React best practices.
 - Leveraging **AI tools** including **Claude Code, Cursor AI, and ChatGPT** to accelerate development, improve code quality, automate repetitive tasks, and enhance productivity.
 - Mentoring junior developers** through code reviews, technical guidance, debugging support, and knowledge sharing.
 - Collaborating with product owners, designers, QA engineers, and cross-functional teams using **Agile/Scrum** methodologies to deliver high-quality software solutions.

AI SKILLS

- AI-Assisted Development
- Prompt Engineering
- Claude Code
- Cursor AI
- ChatGPT

CERTIFICATIONS

- Claude Code in Action
(Anthropic, 2026)
- AWS Certified Developer –
Associate (DVA-C02) (2026)
- The Complete AI Coding
Course (Cursor & Claude Code)
(2025)
- The Ultimate Node.js Course
(2026)
- Modern React with Redux
[2024 Update] (2024)

LEADERSHIP

- Mentored Junior Developers –
Code reviews, technical
guidance, and knowledge
sharing.
- Chairman – College Union,
Lourdes Matha College of
Science & Technology –
Represented 3,000+ students
and led student initiatives.

LANGUAGES

- English (Professional)
- Malayalam (Native)
- Hindi (Basic)

● Software Developer

Spericorn Technology-India

JULY 2022 - NOV 2025

- Developed and maintained scalable web applications using **React.js, Next.js, Node.js, Python, TypeScript, JavaScript, Bootstrap, and SCSS**.
- Built **20+ reusable, responsive UI components** and delivered pixel-perfect, cross-browser compatible user interfaces.
- Developed **interactive dashboards, booking systems, scheduling applications, and admin portals** with dynamic data visualization and real-time updates.
- Integrated **RESTful APIs**, third-party services, and **OAuth 2.0/JWT authentication** to enable secure and seamless system communication.
- Implemented efficient **state management** using **Redux Toolkit, Zustand, React Query, and Context API** for scalable frontend architecture.
- Optimized application performance through **lazy loading, code splitting, memoization, and API optimization**, improving user experience and application responsiveness.
- Worked on **end-to-end product development**, collaborating with cross-functional teams from requirement analysis through deployment and production support.
- Implemented **CI/CD pipelines** using **Git, GitHub Actions, and automated deployment workflows** to improve release efficiency and code quality.
- Participated in **Agile/Scrum** ceremonies including sprint planning, backlog refinement, daily stand-ups, code reviews, and production issue resolution.

PROJECTS

- **Sedres** – Enterprise maritime operations platform with **Kanban boards, KPI dashboards, task management, role-based workflows, and REST API integration**. (React.js, Node.js, Zustand)
- **SGIVS** – Independently developed and **deployed** a government-integrated visa management platform with **dynamic forms, workflow automation, and document management**. (React.js, Node.js, REST APIs)
- **Balance Life Calendar** – AI-powered scheduling platform featuring **calendar management, event scheduling, and OpenAI integration**. (Next.js, Nest.js, PostgreSQL, OpenAI)
- **FCA Tracker** – Building management platform with **asset tracking, maintenance scheduling, analytics dashboards, and role-based access**. (React.js, Redux Toolkit, Node.js, MongoDB)
- **ORMA** – Subscription-based platform with **Stripe payment integration, Google OAuth, user management, and REST API integration**. (React.js, Node.js, PostgreSQL)
- **Enterprise Analytics Dashboard** – Developed interactive dashboards with **charts, reports, filters, data visualization, and real-time business insights**. (React.js, Highcharts, REST APIs)
- **Sales & Order Management System** – Built enterprise modules for **order processing, inventory tracking, document management, approval workflows, and role-based access control**. (React.js, Node.js, PostgreSQL)
